

V-Cone Blender

Models

Laboratory to production scale: standard and custom sizes available from 5 to 10,000 litres capacity.

Applications

This Good Manufacturing Practice (GMP) compliant, traditional, rotary, tumble-action unit with its classic 'V' or 'Y' shape is ideally suited for mixing and blending in the chemical, food, dairy, pharmaceutical, pesticides, dyestuffs and biotechnology industries.

Features and benefits

- V shape ensures good rolling and cross mixing of product giving shorter mixing times
- Cylindrical V-shaped curves allow easy access to internal areas for easier cleaning
- Main drive provided with variable frequency drive to control blender rotational speed
- Smart-stop arrangement to ensure that the blender always stops in an upright position
- Internal baffles ensure good blending and de-agglomeration
- Guard rails are provided with limit switch for safety
- Various materials of construction to comply with specific industry requirements

Options

Intensifier bars can be fitted to achieve extra shear if required.

Conical adaptors can be fitted with butterfly valves for clamping to an Intermediate Bulk Container (IBC) to suit dust-free environments and to facilitate loading and discharge.
